PRESS RELEASE

FOR IMMEDIATE RELEASE

Alaska VA Healthcare System, Chooses DISCO™ Digital Secure Copy For Paperless Release of Information Requests

August 2012 – Irvine, CA

Data Distributing announces the implementation of DISCO™ Digital Secure Copy, an automated, digital solution for Medical Records requests on encrypted CD's, to be used at the VA in Anchorage Alaska.

"We are very pleased to announce that another VA hospital will implement DISCO™ for digital Release of Information", says Nancy Fisher, President and CEO of Data Distributing. "Alaska VA processes a very large amount of paper ROI's and wanted to dramatically reduce the cost of paper, toner, copier expenses and manual operations, while protecting the privacy and integrity of patient information with encryption. DISCO™ was customized to work with VISTA and automatically create copies on CD, thermally label patient data on the CD and encrypt the information. DISCO™ can help the VA satisfy new HITECH Act requirements as well as energy saving and green technology recommendations".

About DISCO™

DISCO™ is an intelligent, digital (ROI) chart copy solution that produces patient record copies on encrypted CD's for medical records departments whether they are EMR-based, paper-based, or a hybrid of both. DISCO™ can perform HL7 queries and retrieves patient information from the HIS or EMR, creating on-demand digital copies of either full charts or specific encounters, and burns the patient data to a Rimage Disc Publishing system. Encrypting software also protects the security of the data. Additionally, DISCO™ indelibly prints the appropriate patient data directly on the CD for easy identification and quick shipment. For more information on DISCO™, please visit us at: www.discomedical.com

About Data Distributing

Founded in 1984, Data Distributing develops innovative, digital and DICOM solutions, along with integration and professional services, to a growing number of facilities, OEMs and channel partners worldwide. This international company, headquartered in California, creates solutions that are used by hundreds of leading medical centers.
