PRESS RELEASE

FOR IMMEDIATE RELEASE

State-level, Digital Chart Copy Mandates Not So Daunting with Data Distributing's DISCO

September 26, 2007 – Santa Cruz, CA - Data Distributing announces immediate availability of Digital Secure Copy (DISCO), an automated, digital, chart copy solution for medical records departments.

"Senate Bill 472 having passed in Illinois legislature sets a precedent that other states may follow," says Nancy Fisher, President of Data Distributing. "SB472 presents a very big challenge for facilities that have not yet deployed an EMR, let alone a CD publishing device, to comply with the states' paperless chart copy mandate. DISCO fills this need, simultaneously providing benefits such as expedited ROI fulfillment and reduction in departmental overhead, to the records department."

About DISCO
DISCO is an intelligent, digital (ROI) chart copy solution that produces patient record copies on disc for medical records departments whether they are EMR-based, paper-based, or a hybrid of both. DISCO performs HL7 queries and retrieves patient information from the HIS or EMR, creating digital copies of either full charts or specific encounters, and burns the patient data to a Rimage Disc Publishing system. Discs can be produced on demand or merged and batch printed after hours. Additionally, DISCO indelibly prints the appropriate patient data directly on the CD for easy identification and quick shipment. For additional information about DISCO, please visit www.discomedical.com.

About Data Distributing
Founded in 1984, Data Distributing develops innovative, digital and DICOM solutions, along with integration and professional services, to a growing number of facilities, OEMs and channel partners worldwide. This international company, headquartered in California, creates solutions that are used by hundreds of leading medical centers.
